

Create Node JS web app

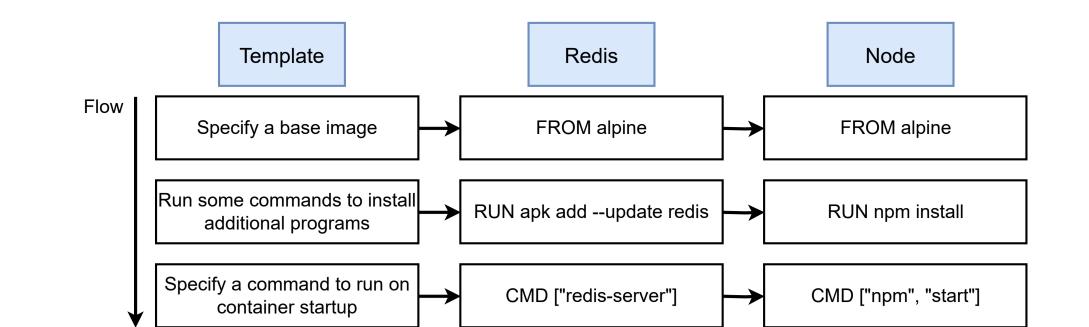

Create a Dockerfile

Build image from dockerfile

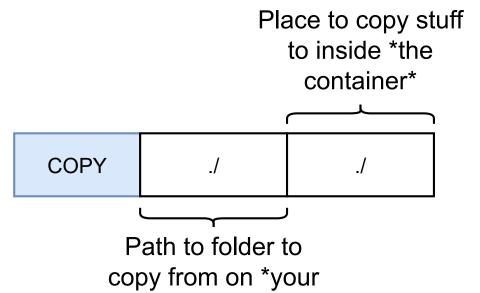

Run image as container

Connect to web app from a browser

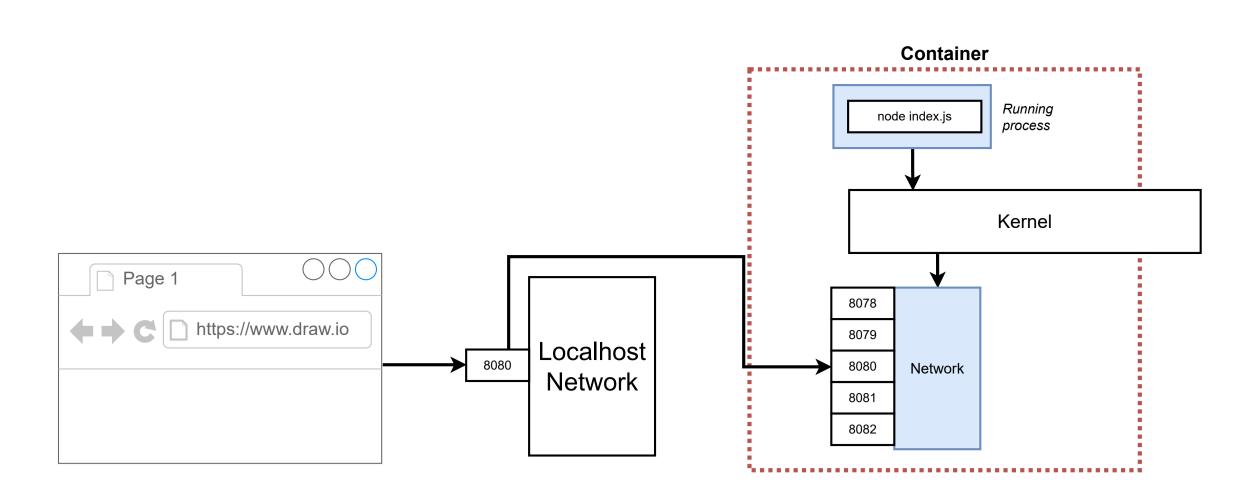

struction tellir Docker Serve what to do	
FROM	node:alpine
COPY	./ ./
RUN	npm install
CMD	["npm", "start"]

copy from on *your machine* relative to build context

Docker Run with Port Mappingthis port inside the container

docker run -p 8080 : 8080 <image name>

Route incoming requests to this port on local host to...
